## ASSISTANCE AND MAINTENANCE

Italforni supplies services of **assistance**, even remote, and **maintenance**, both highly specialized and serious, working with discretion and concreteness. Following an inspection of our skilled technicians, a detailed report will be issued showing the importance of the needed maintenances. Moreover, we offer a service of **assembly, star-up and test** of plants.

## REVAMPING

Our specialised technicians can design great and important changes, not only on Italforni's machines, but also on machines of other brands. Amongst the most important changes, Italforni can realise **lengthening, replacement of combustion system, replacement and modernization of electric system**, and any other kind of transformation aimed to making the machine more flexible, performing and comfortable.

The spare parts shown are the main ones. Italforni can also supply many other components and special items for the ceramic industry.
